# Bringing revolutionary hand sanitizing to every location

DispenserONE® leaves behind the limitations of conventional hand sanitizer systems for a revolutionary new design that achieves the most consistent, reliable dosing ever conceived.

Automatic, touch-free dispensing is complemented by a unique delivery method that's more advanced than anything else on the market. This is not a standard mechanism within a redesigned casing – no other system on earth dispenses like this.

DispenserONE® is also the world's only hand sanitizer dispenser not to rely on disposable pouches, cartridges or batteries and offers a capacity range of 3,000 to 50,000 doses, with models to suit every building from small independent cafes to international airports.

## DispenserONE® Applications

Airports

Conference centres

Hospitals

Shopping malls

Sports stadiums

Supermarkets

Transport hubs

Post offices

Cruise ships

Libraries

Cinemas

Car dealerships

Banks

Education

Gym

Vet

Offices

Restaurants

## Revolutionary dosing technology

DispenserONE®'s advanced dosing mechanism, unprecedented in sanitizer dispensing, automatically provides a precise, consistent quantity of product every time, with 'soft' delivery meaning the risk of splashing is eliminated.

This leading-edge technology provides hundreds of thousands of doses with a minimal maintenance requirement – a level of performance that is unmatched by any other dispenser available today.

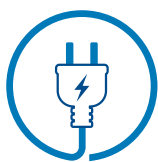

## Remote access

The IoT-ready DispenserONE® models include a built-in Wi-Fi hotspot, allowing managers to view the live status of all their units across multiple sites through their personal online dashboard.

The freedom to manage DispenserONE® from any location means building operators working from home can use key information such as product level to ensure maintenance staff refill only when necessary. As a failsafe, operators also receive notifications when product quantity falls below a pre-set level to help guarantee sanitizer on demand.

And by monitoring usage data on demand for multiple units across different sites, managers can facilitate control of sanitizer stock and make informed decisions on the need for additional systems as user numbers change.

## Mains powered

With most DispenserONE® systems connecting to mains electricity, operators are freed of their reliance on single-use batteries and the associated maintenance costs, guaranteeing continuous use and removing the environmental impact of battery disposal.

## Rechargeable battery operated

Operators looking for all the benefits of DispenserONE® but with the option to move or take the system outdoors can choose a rechargeable battery-powered version of selected models that's ideal for festivals, sporting events and theme parks.

## Touchless technology

For the ultimate hand hygiene and user protection, DispenserONE® helps to prevent the transmission of viruses with its automatic sensor-activated delivery.

This high-precision technology also ensures that users receive the correct quantity of sanitizer every time, guaranteeing proper hand sanitization while reducing the wastage associated with manually-operated units.

### Safe dosing for all

Dispensing nozzle is accessible by children and wheelchair users, with "soft" dosing technology eliminating splashing

### Video screen

High-quality 17" display provides the opportunity to sell advertising space for additional revenue, run promotions or show visitor information

## DispenserONE® Mini

Boasting DispenserONE®'s revolutionary dosing technology within a minimal footprint, the Mini is available as a rechargeable battery-powered system and is designed for low-traffic sites with high hygiene demands such as gyms and cafes.

- 3-litre capacity
- Rechargeable battery powered
- Touchless dosing
- Small footprint

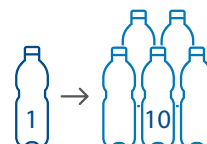

## DispenserONE® Flexi

Designed for small to medium-sized sites such as supermarkets, franchises and public offices, the Flexi comes in both the standard model and a 17" screen version that can be used to unlock revenue through advertising and promotions.

- 10-litre capacity
- Choose from mains or rechargeable battery power
- Choose from 17" screen or non-screen version

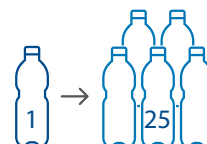

## DispenserONE®

The flagship product in the DispenserONE® range – available with or without a screen – can be accessed remote through the operator's personal online dashboard for unprecedented control over refilling, maintenance and media uploading.

- 25-litre capacity – perfect for shopping malls, regional airports and train stations
- View live usage and product level data from anywhere
- Choose from 17" screen or non-screen version

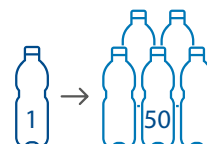

## DispenserONE® Maxi

Delivering a massive 50,000 doses between refills, DispenserONE® Maxi is the ultimate hand hygiene solution for international airports, hospitals, superstores and any other high-traffic areas. Available as a standard system or 17" screen model.

- 50-litre capacity
- Two-pump design prevents unplanned downtime
- Mains powered for constant operation
- Choose from 17" screen or non-screen version

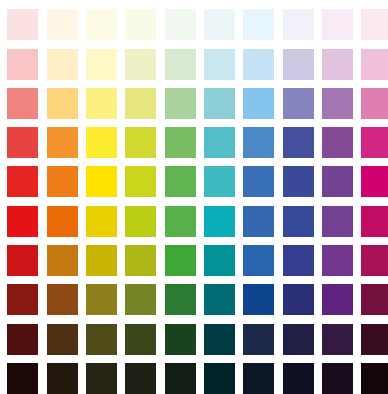

# Bespoke branding

The versatile DispenserONE® can be customized with the colour and logo of your choice, allowing the product to blend in seamlessly with its surroundings and become an integral part of your space.

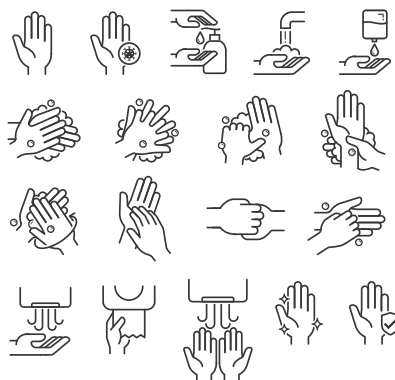

Whether a sports team's crest or a supermarket chain's instantly-recognizable colour scheme, the options are virtually limitless. With a truly personalized system that can be replicated in multiple branches locally, nationally and internationally, DispenserONE® becomes not only an indispensable hygiene solution, but a powerful brand recognition tool.

# Access and control every feature of DispenserONE®, wherever you are

Integrating the latest Internet of Things (IoT) technology with its bespoke Wi-Fi hotspot, the DispenserONE® dashboard provides unprecedented access to the device, allowing you to monitor and manage its full range of features from any location via PC, laptop or smart device.

## Statistics on demand

With a real-time graphical representation of the remaining level of product in your system along with data on the number of doses delivered and total running time, the DispenserONE® dashboard provides a wealth of information that helps you to effectively manage sanitizer stock from the comfort of your own home.

## Your account

Log on to your DispenserONE® account to access your personal dashboard, a unique hub that allows you to instantly connect to your installed base of dispensers across multiple sites in any country.

## Upload media

Add and update media to be played on the DispenserONE® 17" screen at any time, ensuring content such as visitor information and promotions remain current and relevant.

## Never run empty

When the sanitizer tank drops below a pre-defined quantity, an alarm system notifies you via your smart device, allowing you to arrange refilling with the greatest efficiency.

## Total control at your fingertips

Use live usage and level data to make fine adjustments to dosing quantity, allowing you to ensure your sanitizer supply does not run out before the next delivery arrives.
