

fluimac
pump solution

AODD PUMPS

www.fluimac.com

ENGLISH 

MAIN FEATURES

Fluimac is an original, young and dynamic company built in 2012 for a new concept of product. It is specialized in providing pump solutions with an innovative and continuously developing design of range. The huge experience, knowledge and efficiency of its team is the starting point of its own business.

Fluimac stands out for its reliable and prompt technical support and assistance. The internal research and development department ensures the proficiency of its team, which constantly grows in order to satisfy all the customers' needs. The company keeps up with the constant evolution of the national and international market and its quality control guarantees innovative and certificated products, which respect current legal standards.

The organization of the warehouse and the assembly/testing department, allows the company to offer short delivery times, immediate check of availability, speedy shipments and fast service assistance. The policy of Fluimac relies also on excellent customer service and a network of efficient, reliable distributors who ensure willingness, quality and technical support. This makes Fluimac a high quality company, grounded in excellence.

OUR VISION

To be your partner of choice for pumping solutions, globally.

OUR MISSION

Fluimac, is a passionate, dedicated Global Family of Professionals. We listen to each of our Partners and are committed to deliver the right solution in the Fluid handling and Industrial Process market.

OUR VALUES

Mutual Respect Doing business is about being able to generate trust between Customer and Supplier, and this trust can only be developed if there is a basis of mutual respect.

So, at Fluimac we believe in extending the Mutual Respect we have as an internal ethic and bringing it to our Business Partnerships. We'll make sure we deliver against our commitments, on time and in a transparent fashion, so you know can plan for your own business needs.

PAG 5

AIR OPERATED DOUBLE DIAPHRAGM PUMPS

Flow-rate from 4 lt/min to 1.050 lt/min.
Special version Available.

PAG II

PHOENIX

Air operated double diaphragm pumps
Flow-rate from 4 lt/min to 1.050 lt/min.

PAG 25

PHOENIX FOOD

Air operated double diaphragms pumps
Flow-rate from 20 lt/min to 1.050 lt/min.

PAG 30

SPECIAL PUMPS

Phoenix Atex, Accurate Phoenix, Flap Phoenix, Steel Phoenix, Drum Phoenix, Twin Phoenix, Submersible Phoenix and Power Phoenix.

PAG 35

DAMPER

Pneumatic, automatic pulsation dampeners.
Applicable to all size of pumps. Available also in ATEX and FOOD version.

PAG 39

LOTUS

Pure Air operated double diaphragm pumps
Flow-rate from 55 lt/min to 110 lt/min

PAG 46

PIEZO

Air operated sampling pumps
Flow-rate 8 lt/min

PAG 51

ACCESSORIES

Accessories Air operated double diaphragm pumps

AIR OPERATED DOUBLE DIAPHRAGM PUMPS

MATERIALS OF CONSTRUCTION:

PP, PVDF+CF, ALUMINIUM, SS AISI 316, POMc

Flow-rate from 4 lt/min to 1.050 lt/min

PUMP OPERATION

Suction Cycle

1

Compressed air fills right inner chamber, causing the opposing diaphragm to create suction, lifting the lower valve ball, pulling in fluid at inlet. Simultaneously, the right chamber is in "Discharge" cycle.

Discharge Cycle

2

Compressed air fills left inner chamber, causing upper valve ball to open and discharge fluid. Simultaneously, the right chamber is in "Suction" cycle.

INSTALLATION

Pump installed below head (positive suction)

when it is necessary to empty completely the container

Self priming pump installed above head (negative suction)

pump initially works with dry column without problem

Pump installed above drum or tank

with special featuring pump

Pump installed on hopper for high viscosity liquid

hopper's height helps the pump to treat the fluid. Air pressure has to be high, Suction tube has to be bigger than pump's size

Submerged pump

it is necessary to check the chemical compatibility

Suspended

special version with fixing feet also in the upper part, for ceiling fixing

Pump installed on a mobile unit

with a trolley or cart when pump must be often moved

TECHNICAL FEATURES

1	2	3	4	5	6	7	8
Long-lasting diaphragm construction ensures a consistent performance and a longer operating life.	Efficient air distribution design: low air consumption. Un-balanced pilot spool, precisely controls positioning of the main power spool to eliminate stalling and increase efficiency.	All bolted design for an effective sealing to extended leak-proof service.	Solid polypropylene air chambers and plastic air valve for maximum chemical resistance in highly corrosive environments.	Acetalic shuttle ensures long valve life, auto-lubricated material.	Pneumatic exchanger is easily externally accessible for a quick inspection. Special Air system: lube-free, non-stall, non-freeze.	Special pinch clamping, design to minimize wear and increase life of the diaphragm, and provides a uniform seal to avoid leak.	Special exhaust chamber with double silencer to expand diffusion passages, reduce the icing and assure low noise level.

QUALITY 100% wet tested after final assembly: deadheading, priming and sealing

SAFE ATEX certifications in all versions: Conductive plastic pumps available

FLEXIBILITY Multiple porting options available along with interface options

PORTS

**P**
POLYPROPYLENE

Wide chemical compatibility.
General purpose.

**K**
PVDF

Strong chemical resistance to acids.
High temperature resistance.

**S**
SS

High level of corrosion and abrasion resistance.

**Z**
PE

With high molecular weight: High level of abrasion resistance.
(Just D and N balls).

**O**
ACETAL

Wide range of solvent and hydrocarbons resistance. Good level of abrasion resistance.

**V**
VITON

High heat resistance.
Good resistance to aggressive chemicals and hydrocarbons.

**N**
NBR

Good for petroleum-based fluids, water, oils, hydrocarbons and MILD chemicals.

**D**
EPDM

Good with caustic solutions, dilute acids, ketones and alcohols.
Good abrasion resistance.

**T**
PTFE

Widest chemical compatibility, extreme corrosion resistance, non-adhesive, high heat resistance.

PUMP SELECTION

To select the right FLUIMAC pump for your application, the following factors should be considered to achieve economy of operation, long pump life, and minimal maintenance costs:

- The nature of the medium to be pumped, its viscosity, and the solids content
- Pumping capacity in relation to the desired output
- Suction and pressure conditions

Considering these parameters, an optimal pump size is selected when the intersection of the intended installation “pressure vs. flow rate” is near the middle section of the curves.

USING PERFORMANCE CURVES

To determine compressed air requirements and proper size for a FLUIMAC AODD pump, two elements of information are required:

- 1 Required Flow Rate
- 2 Total Delivery Head

As an example, consider a P170 pump performance curve, pumping about 135 l/min at 25m. Point A on the performance curve is where the desired Flow Rate and Total Delivery Head points intersect. This point determines compressed air requirements for the particular pump. At performance point A, the pump will require approximately 7 bar air inlet pressure. To arrive at this figure, follow the solid blue curve to the left to read the air pressure rating in BAR. By looking at the nearest green curve, it is determined the pump will require approximately 900 nl/min (Normal Liter per minute) of air consumption

SPECIFIED SUCTION LIFT

With a suction lift of 4 m, pump rate decreases by approximately 20%. Valid for pumps 3/4" and larger; data varies with pump configuration.

VISCOUS LIQUIDS PERFORMANCE DATA

During the conveyance of a fluid with a viscosity of 6000cPs, the pump rate decreases to 60% of its rated value (100% = water). Valid for 3/4" pumps & larger.

PUMPS

ALL RANGE

I M2 Ex h I Mb X

I	Mines
M2	Category M2 equipment that can be installed in mines in "hazardous condition 2" that is in a potentially explosive atmosphere consisting of firedamp and coal dust.
Ex	Conventional symbol Ex
h	Protection mode for constructional safety "c"
I	Equipment for use in mine
Mb	Protection level EPL Mb in accordance with EN 60079-0:12 and EN 80079-36:16 standards.
X	The internal area of the pump is not ATEX, i.e., it cannot process explosive fluids when installed in mines. The pumps must be installed in areas with low impact risk.

NB: aluminium versions excluded

TECHNICAL DATA

Fluimac technical file is deposited with the certifying body IEC EUROFINS. The equipment user is responsible for classifying their installation zone. Before installation the equipment user always has to check the compliance with the classification of the installation zone.

ACCURATE PHOENIX

PUMPS

AP7 AP90
AP18 AP120
AP30 AP170
AP60 AP252

MAINS APPLICATIONS

- CHEMICAL INDUSTRY
- WASTE DISPOSAL TECHNOLOGY
- FLEXOGRAPHIC INDUSTRY
- PAINTING INDUSTRY
- PRINTING INDUSTRY
- WATER TREATMENT

TECHNICAL DATA

ACCURATE PHOENIX are Pumps that give you the external pump control necessary for exacting applications such as batching. Featuring a direct electrical interface that utilizes electrical impulses to stroke the pump instead of differential pressure, the ACCURATE PHOENIX provides a variable stroke rate that you can easily control as needed.

Note: PLC and computer system not included.

FLAP PHOENIX

PUMPS

FP0170	FPF0170
FP0400	FPF0400
FP0700	FPF0700
FP1000	FPF1000

MAIN APPLICATIONS

- WASTE DISPOSAL TECHNOLOGY
- FOOD INDUSTRY
- CERAMIC

TECHNICAL DATA

FLAP PHOENIX are heavy duty flap valve pump has a proven design that solves the most common challenges in bad applications, sump applications, mine dewatering, food applications and any liquid application involving solids. Thanks to the FLAP valve the solid passing increase up to 30mm

STEEL PHOENIX

PUMPS

from SP0018 to SP0700 MODELS
from SPF0018 to SPF0700 MODELS

MAIN APPLICATIONS

- CHEMICAL INDUSTRY
- AUTOMOTIVE INDUSTRY
- FOOD INDUSTRY

TECHNICAL DATA

The entire construction of the central block is made of Stainless Steel 316 making the PHOENIX STEEL air operated double diaphragms pumps series extremely resistant to corrosion, guaranteeing at the same time robust and solid solution for continuous operations, also with low or high temperature.

DRUM PHOENIX

PUMPS

DP18 - DP30 - DP60 - DP120 - DP170

MAIN APPLICATIONS

- CHEMICAL INDUSTRY
- WASTE DISPOSAL TECHNOLOGY
- AUTOMOTIVE INDUSTRY
- FOOD INDUSTRY

TECHNICAL DATA

DRUM PHOENIX are designed for emptying drums and containers, and provide an economical and wear resistant alternative to other pumping systems. In order to handle a wide range of fluids, DP pumps are available in all materials. The pump can be quickly and easily mounted on the drum with its feet. The drum will be completely emptied with a suction pipe.

SUBMERSIBLE PHOENIX

PUMPS

ALL RANGE

MAIN APPLICATIONS

- CHEMICAL INDUSTRY
- WASTE DISPOSAL TECHNOLOGY
- FOOD INDUSTRY
- PETROL-CHEMICAL INDUSTRY PUMPS MAIN

TECHNICAL DATA

SUBMERSIBLE pumps may be submerged into the liquid. It is important to make sure that all components which are in contact with the liquid are chemically compatible. The air exhaust must be led to the atmosphere by means of a hose.

NOTE: check the compatibility chart for all materials.

TWIN PHOENIX

PUMPS

ALL RANGE

MAIN APPLICATIONS

- PAINTING INDUSTRY
- WASTEWATER TECHNOLOGY
- PRINTING INDUSTRY
- PAPER PROCESSING
- FLEXOGRAPHIC INDUSTRY

TECHNICAL DATA

TWIN PHOENIX are mainly used in the textile and paper processing industry. These dual action pumps are able to transfer two different media independently and simultaneously. This is accomplished by using separate connections on the suction and discharge ports, keeping two pumped media isolated from each other, preventing unwanted mixing.

POWDER PHOENIX

PUMPS

ALL RANGE

MAIN APPLICATIONS

- PAINTING INDUSTRY
- WASTEWATER TECHNOLOGY
- PRINTING INDUSTRY
- PAPER PROCESSING
- FLEXOGRAPHIC INDUSTRY

TECHNICAL DATA

POWDERS pumps are designed to move bulk powders more effectively throughout your process vs. other unsafe and labor intensive means. These heavy duty pumps will consistently transfer fine-grained, low-bulk density dry powders in a dust-free operation.

DAMPER

Pneumatic, automatic pulsation dampeners

MATERIAL OF CONSTRUCTION:

PP, PVDF, ALUMINIUM, SS AISI 316, POMc

Applicable to all size of pumps.

ATEX ZONE 2 AND ZONE I CERTIFICATION

Available also in FOOD version.

DAMPER

The active pulsation dampener is the most efficient way to remove pressure variations on the discharge of the pump. Fluimac pulsation dampener works actively with compressed air and a diaphragm, setting automatically the correct pressure to minimize the pulsations. Pulsation dampeners require minimum maintenance and are, subject to the requirements of the application, available in the same housing and diaphragm materials as the pump.

HOW IT WORK

The pulsating flow of the discharge forces the diaphragm upwards where it is cushioned by the air in the chamber. The flexing of the diaphragm absorbs the pulsation giving a smooth flow.

Significant Pulsation Reduction with an average 70% - 80% pulsation reduction in high back pressure applications

APPLICATION

- **METERING/ INJECTION/DOSING**
Equalizes discharge pressure spikes, increasing accuracy
- **FILTER PRESS/INLINE FILTERS**
Increases filter efficiency and life by providing a smooth flow
- **SPRAYING**
Smooth, consistent spray pattern.
- **FILLING**
Eliminates inconsistent filling and splashing.
- **TRANSFER**
Eliminates harmful water hammer, preventing pipe and valve damage.

With high molecular weight: High level of abrasion resistance.

ZC

CONDUCTIVE PE

With high molecular weight: High level of abrasion resistance. Groundable.

PP

PURE
POLYPROPYLENE

Wide chemical compatibility. General purpose.

DT

EPDM+PTFE

Widest chemical compatibility, extreme corrosion resistance, non-adhesive, high heat resistance.

D

EPDM

OK with caustic solutions, dilute acids, ketones and alcohols. Good abrasion resistance.

T

PTFE

Widest chemical compatibility, extreme corrosion resistance, non-adhesive, high heat resistance.

S
SS

High level of corrosion and abrasion resistance. Good for viscous fluids.

D

EPDM

OK with caustic solutions, dilute acids, ketones and alcohols. Good abrasion resistance.

PUMP OPERATION

Fluid

Air

Suction Cycle

Compressed air fills right inner chamber, causing the opposing diaphragm to create suction, lifting the lower valve ball, pulling in fluid at inlet. Simultaneously, the right chamber is in "Discharge" cycle.

1

Discharge Cycle

Compressed air fills left inner chamber, causing upper valve ball to open and discharge fluid. Simultaneously, the right chamber is in "Suction" cycle.

SPECIAL FEATURES

TL PTFE LOTUS CENTRAL BLOCK IN PTFE

INSTALLATION

**Pump installed below head (positive suction)**

when it is necessary to empty completely the container

**Pump installed above drum or tank**

with special featuring pump

**Pump installed on a mobile unit**

with a trolley or cart when pump must be often moved

**Self priming pump installed above head (negative suction)**

pump initially works with dry column without problem

**Chemical System**

pumps are suitable to be integrated in dosing systems for concentrated acids at high temperature

TECHNICAL FEATURES

The materials of construction of the Lotus series are PTFE, CONDUCTIVE PTFE, PE, CONDUCTIVE PE and PURE POLYPROPYLENE. The Lotus pumps are suitable to work with hazardous chemicals such as acids, caustics, and solvents.

FEATURES AND BENEFITS

- Machined plastic design
- Increased capacity
- Increased safety
- Decreased air consumption
- Easy cleanability
- Reduced noise level
- Decreased downtime
- Optimized flow pattern
- Increased quality
- Long service life
- Increased reliability
- Used in demanding process applications
- Robust plastic design with reinforcement ring for enhanced sealing and torque retention

APPLICATIONS

- Abrasive Slurries
- Solar Cell
- Biopharmaceutical
- Chemicals
- Etching Agents
- Ceramic
- Sludge Transfer
- Glazes Transfer
- Paints
- Varnish
- High Concentrated Acids and Bases
- Grinding and Drilling Emulsions
- Paper and Printing
- Glue Transport
- Printing Inks Transport
- Industrial Water Treatment
- Sample Analysis
- Wastewater Neutralization
- Feeding Filter Presses with Sludge
- Chemical Treatment of Wafers
- Corrosive, Hazardous or Toxic Chemicals

Machined for Precision

FLUIMAC's solid plastic block increases the pump's strength and life cycle while eliminating many maintenance concerns. The LOTUS Series CNC machined solid block of PTFE, PE or PP allows to deal with the harshest environments. The LOTUS Series solid plastic block construction is mechanically machined rather than injection moulded. The CNC technology enables tight tolerances, along with reduced vibration, less risk of leakage, and greater stability and durability. The high static mass leads to smooth operation with reduced vibration.

TECHNICAL DATA

PIEZO

MATERIALS OF CONSTRUCTION:

PP, PVDF, POMc, POMc+CF

Flow-rate 8 lt/min

ATEX VERSION AVAILABLE

PIEZO

FLUIMAC developed and patented a new pump model, PIEZO PUMP, a unique pump, designed for the environmental remediation applications.

PIEZO PUMP is an easily transportable pneumatic system, which can be installed inside wells with a minimum internal diameter of 4" for the following purposes:

- Groundwater pumping as part of remediation activities or remediation plants;
- Recovery Technology for LNAPL / DNALP (light / dense non-aqueous phase liquid);
- Oil handling in ATEX classified areas;
- Low-flow representative sampling at different depths inside environmental monitoring wells;
- Excellent tool for environmental emergency response activities.

FEATURES:

- Operation with high subsidence value of water level (max. approx. 50 m);
- Possibility to work both above and below the water level;
- Can work with solids in the water flow (max. approx. 2.5 mm);
- Constant pumping at low flow rates (approx. 0.25-4.00 l/min)
- Easy flow management through compressed air supply;
- Lightweight, compact and compatible with 4" wells;
- Possibility to send the air exhaust out of the well.

ACCESSORIES

AIR REGULATION KIT

Adjust and set air pressure and air flow-rate with a filter regulator, pressure gauge and air valve unit.

INOX TROLLEY

It makes pumps transportable.

SWITCH VALVES

Remotely start and stop with a solenoid or pneumatic valve for the pump's air line.

ANTI VIBRATION FEET KIT

Reduces physical vibration from AODD pump operation.

STROKE COUNTER

Count the number of strokes, connected to a control. It allows various type of monitoring.

PP, PVDF, ALU SS NOOZLE

Dispenser to delivery control and batching.

DIAPHRAM FAILURE DETECTION FLUID-GUARD

The Leak Detector provide a signal and the pump can be shut down when diaphragms fail.

REINFORCED PVC HOSE

With metal reinforcement for suction/discharge, also food-grade.

PNEUMATIC BATCH CONTROL

Pneumatic batcher can control any FLUIMAC AODD pump allowing you to set the cycles amount and count the strokes

FOOT BALL VALVE

Realized in PP and PVDF.
Size available 1" - 1 1/4" - 1 1/2" - 2"
Used to prevent the suction hose from emptyng.

ELECTRONIC BATCH CONTROL

Electronic batcher can control any FLUIMAC AODD pump allowing you to set the cycles amount and count the strokes

VALVES FITTINGS AND CONNECTIONS IN PP, PVC, INOX

BASKET STRAINER FILTERS IN PP

Installed on the suction of the pumps, protects them from suspended solids and impurity.

FLANGE CONNECTION KIT

It modifies a pump with BSP connection into a flanged pump.

PRESSURE BOOSTER

Where the line pressure is not enough, this system doubles the in let pressure to supply correctly the air to the pump

WALL FIXING BRACKET

Wall fixing bracket for diaphragm pumps, for all sizes.
