

DESCRIPTION

For the application of pre-wash shampoos or detergents to vehicles, automotive cleaning professionals turn to SEKO's ProPulv single-product spraying system for its simple operation, reliable performance and longevity.

Featuring a stainless-steel lance and premium-quality hose, ProPulv delivers the level of robustness and longevity you'd expect from a SEKO product, while the system's HACCP compliance means it's suitable for the safe washing of food and beverage trucks among other vehicles.

Requiring no power supply, ProPulv has an integrated hose rack and can either be wall mounted or assembled with a trolley to provide a convenient mobile solution.

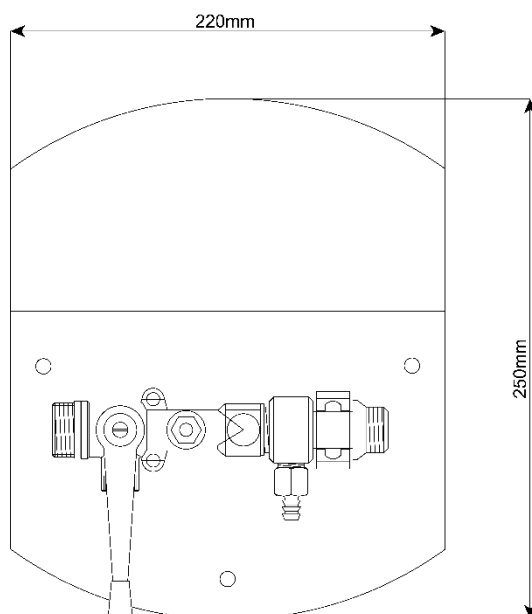

TECHNICAL CHARACTERISTICS

- Venturi system has no moving parts, simplifying maintenance
- Full installation kit supplied, including mounting and suction accessories, inlet hose, discharge hose, lance and tank holder

Specification

- Dilution ratios: 1:167–1:6 (0.6–15.7%)
- Working temperature: Up to 50°C
- Working pressure: 2–6 bar
