

ACCESSORIES

INJECTION VALVE - Solenoid Pumps

Technical characteristics

These items are available in FIXED (more or less 0.2 bar) option, with PVDF or PVDF-T body, FPM or EPDM seals, spring in Hastelloy C276, ball in Ceramic, connection for Ø4/6, Ø8x12mm, or inch size tube.

Their main use, with the non-return valve function, it is in the presence of back pressure on the system, or in applications where it is necessary to ensure a constant flow rate in case of lack of injection line pressure.
